USDA Forest Service
Appeal Decision
Retrieval Service

Introduction

The Forest Service manages the national forests for a variety of uses and purposes. Forest officers make many decisions affecting minerals, timber, recreation, range, water, wilderness, wildlife, and other forest resources and management activities. These decisions may affect communities, organizations, or individuals. The Department of Agriculture provides a process by which affected individuals or groups may appeal National Forest System management decisions. These procedures are set forth in 36 CFR 211.18.

An electronic retrieval service provides access to appeal decisions rendered by the Chief of the Forest Service and the Secretary of Agriculture on appeals filed pursuant to 36 CFR 211.18. The service contains key items about each appeal, plus an abstract and the complete text of each decision. It provides a menu-driven inquiry language so that information can be selectively retrieved electronically.

The decisions are kept on a data base on the ITT Dialcom network in the INFO-TEXT data base language. Dialcom is a widely used service that is accessible by TELENET, TYMNET, and direct dial. The data base and system support staff are located at Silver Spring, MD. To access this system you will need an ITT Dialcom user ID number, which you can obtain by first contacting the System Manager, at the address given below, who will send you the necessary contract and instructions.

To use the service, you will need either a word processor with telecommunications capability, a microprocessor, and modem or a computer terminal with asynchronous ASCII capability. You will find the service easier to use if you already have some experience or training in electronic retrieval of computer files.

We hope that this electronic retrieval service for USDA Forest Service appeal decisions will meet your needs. We would appreciate your comments about the service, its usefulness, suggested enhancements, and so forth. Please send them to the Manager, Forest Service Appeal Decision Retrieval Service, USDA Forest Service, P.O. Box 2417 (Rm. 4211S), Washington, DC 20013.

If you have any problems or questions, you may call the Manager at (202) 382-9346.

NOTICE TO ALL USERS OF THE RETRIEVAL SERVICE

As of September 1985, the data base contained all fiscal year 1983 and fiscal year 1984 decision letters and will be updated as new decisions are rendered. If you are interested in information on earlier appeals please contact the Manager.

This service is still considered to be in the pilot test stage. As we gain experience, it may be modified or even canceled. Should this happen, we will notify all users.

Three basic steps are followed to query the appeals data base: 1) sign on the system, 2) identify the data base you wish to query, and 3) select the option you want to use to query the data base.

You are permitted to sign onto ITT/Dialcom computers when you are issued a user ID number. Your ID is made up of an alphabetic prefix (three characters) immediately followed by three or four digits, for example DAG123. The ID represents a unique area of the computer reserved for your use and file storage.

Associated with your ID and required for signing on is an owner password consisting of usually two to four alphabetic characters. Your password is an important security feature of ITT/Dialcom systems, and it should be kept confidential.

The system number tells you which ITT/Dialcom computer system your ID is on. The USDA Forest Service Appeal System is on system 57.

In this Guide, responses and prompts from the system are indicated in **bold face type**, user's responses are indicated in ***italics*** , and keys are in brackets [RETURN]. Also, the character **>** indicates a system level prompt.

Accessing the System

The USDA Forest Service Appeals System can be accessed via TELENET, TYMNET, or direct dial. The following chart shows the sign-on procedures via these three methods.

Via TELENET	Via TYMNET	Via Direct Dial #
Power on to terminal and acoustical coupler. Be sure terminal is ONLINE.	Power on to terminal and acoustical coupler. Be sure terminal is ONLINE.	Power on to terminal and acoustical coupler. Be sure terminal is ONLINE.
Phone TELENET at your TELENET number. Place receiver in acoustical coupler. Press [RETURN] twice.	Phone TYMENET at your TYMENET number. Place receiver in acoustical coupler. Wait for response.	Phone DIALCOM at: (301) 565-0550. Place receiver in acoustical coupler. Press [RETURN] once.
System response: **TERMINAL =**	System response: **PLEASE TYPE IN YOUR TERMINAL IDENTIFIER:** Type: ***a***	System response: **Dialcom X.25 Network** **At "*" type C 0###** Type: ***C 057***

Sign on with ID and PASSWORD.Depress [CTRL] key with PASSWORD if it is "silent"	Sign on with ID and PASSWORD. Depress [CTRL] key with PASSWORD if it is "silent"	Sign on with ID and PASSWORD. Depress [CTRL] key with PASSWORD if it is "silent"

After your ID number is accepted, the system responds:

ITT Dialcom Computer Services 18.4E (57)
On at {time} {date} EDT
Last On at {time} {date} EDT

Once you've signed on properly, the system level prompt (>) will appear on your screen. At the prompt, you must enter the access code to our data base:

> *Forest* [return]

This entry gives you access to the data base.

The following response will appear on the screen next:

Setting up Forest Service Appeal System...Please Wait

after which the QUERY MENU will appear:

USDA FOREST SERVICE APPEAL SYSTEM
QUERY MENU

PLEASE SELECT ONE OF THE FOLLOWING OPTIONS

1 – REGION/OFFICE	**7 – FOREST**
2 – DATE OF DECISION	**8 – APPEAL NUMBER**
3 – DATE RECEIVED	**9 – GENERAL SUBJECT**
4 – DATE OF NOTICE	**10 – APPEAL TITLE**
5 – APPELLANT	**11 – INTERVENOR**
6 – ACTION TO DATE	**12 – TEXT**

****

ENTER DESIRED OPTION (99 TO EXIT)> 7

You are now ready to use the system.

Using The System

If you do not enter an option but just depress [return], you will automatically select all records in the appeals data base. This is useful if you wish to know the size of the data base. You also may exit the data base at this point by entering *99.* When you enter a valid option number, the system will prompt you to enter the search criteria.

The following sections discuss how to a) enter criteria for non-keyword searches (options 1, 2, 3, 4, and 8) and keyword searches (options 5, 7, 9, 10, 11, and 12); and b) select the appropriate query option [(S)CAN, (R)EAD, (P)RINT, (M)ENU, (Q)UIT?]. Option 6 is not currently used.

Non-keyword Searches

Options 1, 2, 3, 4, and 8 request search criteria that must match exactly with data contained in that item. If no exact matches are found, no records are selected, and the QUERY MENU will be redisplayed (see below).

```
USDA FOREST SERVICE APPEAL SYSTEM
QUERY MENU

PLEASE SELECT ONE OF THE FOLLOWING OPTIONS

1 – REGION/OFFICE                7 – FOREST
2 – DATE OF DECISION             8 – APPEAL NUMBER
3 – DATE RECEIVED                9 – GENERAL SUBJECT
4 – DATE OF NOTICE              10 – APPEAL TITLE
5 – APPELLANT                   11 – INTERVENOR
6 – ACTION TO DATE              12 – TEXT
**********************************************************************

ENTER DESIRED OPTION (99 TO EXIT)> 7
FOREST KEYWORD(S)> Modoc
    0 RECORD(S) SELECTED
RETURNING TO BEGINNING SO THAT QUERY SESSION
MAY BE RE-STARTED
```

If an exact match is found, the number of records selected is displayed and the prompt to **(S)CAN, (R)EAD, (P)RINT, (M)ENU, (Q)UIT?** is requested.

```
USDA FOREST SERVICE APPEAL SYSTEM
QUERY MENU

PLEASE SELECT ONE OF THE FOLLOWING OPTIONS

1 – REGION/OFFICE                7 – FOREST
2 – DATE OF DECISION             8 – APPEAL NUMBER
3 – DATE RECEIVED                9 – GENERAL SUBJECT
4 – DATE OF NOTICE              10 – APPEAL TITLE
5 – APPELLANT                   11 – INTERVENOR
6 – ACTION TO DATE              12 – TEXT
**********************************************************************

ENTER DESIRED OPTION (99 TO EXIT)> 7
FOREST KEYWORD(S)> Shasta-Trinity
    13 RECORD(S) SELECTED
(S)CAN, (R)EAD, (P)RINT, (M)ENU, (Q)UIT?>
```

If you depress [RETURN] in response to the search criteria request, the QUERY MENU will be redisplayed.

OPTION 1 -- REGION/OFFICE. Selection of this option will cause the following prompt to be displayed:

ENTER REGION > *R-5*

Enter one of the region codes listed in appendix A. For example, if you are interested in appeal decisions from the Pacific Southwest Region, which has its regional office in San Francisco, CA, you will enter R-5.

OPTION 2, OPTION 3, OPTION 4 -- DATE OF DECISION, DATE RECEIVED, DATE OF NOTICE, respectively. Selection of these options from the QUERY MENU will allow you to search for information based on the date items. Search criteria must be valid dates in the format of MM/DD/YY. The prompts shown below will be displayed:

ENTER STARTING DATE RANGE > *10/01/83*
ENTER ENDING DATE RANGE > *9/30/84*

Enter the starting date. Records will be selected for the specified date item that falls within the indicated range. If you wish to select records for only one day, depress [RETURN] when prompted for the ending date range.

OPTION 8 -- APPEAL NUMBER. With this option, you can choose specific records according to the appeal number of the decision, a unique number assigned by the Forest Service. The appeal number prompt shown below will be redisplayed after each selection until you depress [RETURN], which ends the entry session (i.e., C/R TO STOP).

APPEAL NUMBER (C/R TO STOP) > *05140985*

If no appeal number is entered in response to the first prompt, the QUERY MENU will be redisplayed.

Keyword Searches

OPTIONS 5, 7, 9, 10, 11, and 12 -- APPELLANT, FOREST, GENERAL SUBJECT, APPEAL TITLE, INTERVENOR, and TEXT, respectively. These options use keyword search phrases as search criteria. Upon entry of the keyword(s) or phrase, the specified item will be searched for and the number of records selected will be displayed.

The search will be most effective if "stopwords" (for example, a, an, and, are, at, be, in, is, not, of, or, that, the, this, to, will) are not used in the keyword phrase. Omit these and other articles, conjunctions, prepositions, pronouns, and forms of the verbs "to be" and "to have" from your search criteria. In the search keyword phrase "in the middle," enter only the word "middle". Never enter only stopwords in a search criterion, for the search will fail.

OPTION 5 -- APPELLANT. If you select this option, the screen will display the following prompt:

APPELLANT KEYWORD(S) > *Sierra Club*

Up to 60 characters may be entered for the search criterion.

OPTION 7 -- FOREST. Selection of this option results in display of the following prompt:

FOREST KEYWORD(S) > *Willamette*

Enter the name exactly as shown in appendix B.

OPTION 9 -- GENERAL SUBJECT. After selecting this option, you will be prompted with:

GENERAL SUBJECT KEYWORD(S) > *Timber*

Enter no more than 30 characters for the search phrase. General subject keywords (e.g., timber) identify the staff area to which the primary issues of the appeal relate. Check appendix C for the names of the various staff areas that can be entered.

OPTION 10 -- APPEAL TITLE. You can enter up to 60 characters for the search phrase after this prompt is displayed:

APPEAL TITLE KEYWORD(S) > *Timber Sale*

The appeal title is a brief description of the decision being appealed, for example, "Timber Sale." Other examples include "Forest Plan," "Special Use Permit," and "Procedural-Stay Denial."

OPTION 11 -- INTERVENOR. Entry of this option will result in display of the prompt shown below:

INTERVENOR KEYWORD(S) >
SE Alaska Conservation Council

Sixty characters may be entered in the search phrase.

OPTION 12 -- TEXT. Use this option to select records based on search criteria that are contained in the text of the appeal decision.

TEXT KEYWORD(S) > *NEPA*

For most queries, we recommend that you use this option. You can enter a maximum of 60 characters.

Information can be retrieved hierarchically, that is, you can start with a general search, retain the selected information, and then further query the data base to refine an inquiry and reduce the set of selected appeals. For example, you might enter the acronym "NEPA" after you've selected OPTION 12 and the system would give you the number of appeals that contain this acronym in the text of the decision letter. You could then return to the query menu, select OPTION 9, GENERAL SUBJECT, enter the word "Timber" and the system would give you the number of records that mentioned NEPA where the primary issues related to the Timber Management Staff. Or, to narrow the search even further, you could again return to the QUERY MENU, select OPTION 1, REGION/OFFICE, enter R-5, and the system would tell you how many of the records selected (containing NEPA in the text and processed through the Timber Management Staff) were from the Pacific Southwest Region - Region 5.

Query Options

After the number of selected records is displayed, the following prompt will appear:

(S)CAN, (R)EAD, (P)RINT, (M)ENU, (Q)UIT? >

Enter *S, R, P, M,* or *Q.* (Remember to enter the capital letter because the system will not accept lowercase letters for this prompt.) If you enter *S* , for SCAN, the system will display all selected appeal records in a brief format (see below for example) that lists only specific items and an abstract of the decision text .

USDA FOREST SERVICE APPEAL SYSTEM

RELATED
APPEAL NUMBER: 01030953 APPEALS:

REGION: R-1 FOREST: BITTERROOT

APPELLANT: WILLIAM WOOD

APPEAL TITLE: PROCEDURAL - STAY DENIAL

ABSTRACT:

Forest Supervisor's decision to construct an 8.5 mile road into the Upper Sleeping Child area was appealed. The appeal to the Chief's level was a procedural matter regarding the Regional Forester's denial of a request for a stay of the decision. It was this denial that was appealed to the Chief. As a result this decision pertains only to that question.

In the appellant's notice of appeal, he requested a stay of the Forest Supervisor's decision and asked that the survey for the road be stopped. The Regional Forester interpreted the appellant's request as only applying to the road survey, and subsequently denied the stay.

The appellant's request was interpreted differently at the Chief's level. The request for a stay of decision was granted. The request to stop the road survey was dismissed since the survey was already completed and relief could not therefore be granted.

Depress RETURN to continue or enter 99 to stop>

If you enter *R*, or READ, the system will display all text (not just the abstract) for the appeal decision, and additional key items of information (as shown below).

APPEAL NUMBER: 06150814 **RELATED APPEALS:**

REGION: R-6 **FOREST: UMPQUA**

DECISION DATE: 3/30/1983 **DATE RECEIVED: 12/3/1982**
DATE OF NOTICE: 9/10/1982

APPELLANT: LESLEE SHERMAN FOR UMPQUA WILDERNESS DEFENDERS

GENERAL SUBJECT: LAND MANAGEMENT PLANNING

INTERVENOR:

ACTION TO DATE:

TEXT:

1570 (LMP)
06150814
March 31, 1983

Ms. Leslee K. Sherman
President
Umpqua Wilderness Defenders
PO Box 15
Roseburg, Oregon 97470

Dear Ms. Sherman:

We wrote to you on December 23, 1982 (copy enclosed), to let you know that we would delay our decision on your appeal regarding the Boulder Creek Roadless Area, Umpqua National Forest. The delay was due to the Administration's pending decision about how to respond to the Ninth Circuit Court RARE II decision (California vs. Block). This decision, which was made recently, is that National Forest roadless areas studied for wilderness potential during RARE II will be subject to reevaluation as part of the land and resource management planning which is now in progress for each of 120 individual National Forest units (National Forest Management Act (NFMA) and 36 CFR 219).
MORE? [cr]
For all areas subject to further evaluation, the requirements for site-specific discussion of environmental consequences described in the California vs. Block decision will be met in reasonable detail in the Forest plan draft EIS or supplement thereto.

Our review of your appeal indicates that the Final Supplement to the Final Environmental Impact Statement to the Umpqua National Forest Land Management Plan does not overcome the RARE II shortcomings. Therefore, we agree that continuation of management activities in Boulder Creek that are the subject of your appeal would be inappropriate at this time.

It is our decision, therefore, that the Boulder Creek Roadless Area be subject to reevaluation during the development of the Umpqua National Forest NFMA plan. In the interim, no management activities in Boulder Creek that are challenged by your appeal will be implemented. Management elsewhere on the Umpqua National Forest may proceed, consistent with existing land and resource management plans.

This decision is the final Administrative determination of the Department of Agriculture, a copy of which was sent today to the Office of the Secretary for discretionary review, as provided for in the Secretary's appeal regulation at 36 CFR 211.19(j)(2).
MORE? [cr]
Sincerely,

/s/ Charles R. Hartgraves for
R. MAX PETERSON
Chief

Depress RETURN to continue OR enter 99 to stop>

If you enter *P,* or PRINT, the system will display all the text, as with *R* or READ, adding the current date. Prior to displaying the date, the system will display the prompt below.

DEPRESS THE RETURN KEY WHEN READY >

This prompt allows you enough time to set up a word processor for data transfer to a diskette. When everything is ready, depress [RETURN]. If you want to transfer all selected records to the diskette, enter *Y* for the first **MORE?** prompt.

If you enter *M,* or MENU, the system will redisplay the QUERY MENU while retaining the currently selected records, thus allowing you to select another option from the QUERY MENU in order to further reduce the set of selected records.

If you enter *Q,* or QUIT, the system will return to the full set of records in the appeals data base. This is useful if you selected too few records to begin with or if you entered erroneous search criteria.

For the SCAN, READ, and PRINT options discussed above, there may be more than 23 lines of text for the ABSTRACT or the TEXT. If this is the case, the prompt shown below will be displayed:

MORE? > *Y* or *N*

If you enter *Y* for yes, all remaining text for the record will be displayed. If you enter *N* for no, the prompt shown below will be displayed:

Depress RETURN to continue OR enter S to stop > *[RETURN]* or *S*

If you depress [RETURN] the next record will be displayed; if you enter *S,* the display will stop and the screen return to the (S)CAN, (R)EAD, (P)RINT, (M)ENU, (Q)UIT? prompt. When you are finished with all the records selected, the system will redisplay this prompt.

Ending the Query Session and Exiting the System

To end the query session, enter either *M* for MENU or *Q* for QUIT, both of which will redisplay the QUERY MENU. The system will prompt:

ENTER DESIRED OPTION (99 TO EXIT) > *99*

Enter 99 and you will be out of the data base.

The system prompt will then appear on the screen:

> *Logout*

Enter Logout and you will be off Dialcom.
